Sport and Exercise Nutrition

Susan A. Lanham-New (Editor), Samantha Stear (Editor), Susan Shirreffs (Editor), Adam Collins (Editor)

Description

Now widely adopted on courses throughout the world, the prestigious Nutrition Society Textbook series provides students with the scientific basics in nutrition in the context of a systems and disease approach rather than on a nutrient by nutrient basis. In addition, books provide a means to enable teachers and students to explore the core principles of nutrition and to apply these throughout their training to foster critical thinking at all times.

This NS Textbook on Sport and Exercise Nutrition has been written to cover the latest information on the science and practice of sport and exercise nutrition. A key concept behind this textbook is that it aims to combine the viewpoints of world leading nutrition experts from both academia/research and a practical stand point. Plus where necessary there are additional practitioner based authors to ensure theory is translated into practice for each chapter in the form of either 'practice tips' or 'information sheets' at the end of relevant chapters.

The textbook in essence can be divided into three distinct but integrated parts:

- Part 1: covers the key components of the science that supports the practice of sport and exercise nutrition including comprehensive reviews on: nutrients both in general and as exercise fuels; exercise physiology; hydration, micronutrients; and supplements.
- Part 2: moves into focusing on specific nutrition strategies to support different types of training including: resistance; power/sprint; middle distance/speed endurance; endurance; technical/skill, team; and specific competition nutrition needs.
  The unique format of this textbook is that it breaks down nutrition support into training specific as opposed to the traditional sport specific support. This reflects the majority of current sport and exercise requirements of the need to undertake concurrent training and therefore facilitating targeted nutrition support to the different training components through the various macro and micro training cycles.
- Part 3: explores some of the practical issues encountered in working in the sport and exercise nutrition field and includes key sport related topics such as: disability sport; weight management; eating disorders; bone and gut health; immunity; injury; travel; and special populations and situations.

Table of Contents

Contributors vii
• Series Foreword ix
• Preface xi
• 1 Nutrient Basics 1
  Adam L Collins, Penny J Hunking and Samantha J Stear
• 2 Exercise Physiology 16
  Susan M Shirreffs
• 3 Exercise Biochemistry 20
  Stuart DR Galloway
• 4 Carbohydrate 31
  Askar Jeukendrup and Clyde Williams
• 5 Protein and Amino Acids 41
  Peter WR Lemon
• 6 Fat Metabolism 51
  Bente Kiens and John A Hawley
• 7 Fluids and Electrolytes 59
  Susan M Shirreffs
• 8 Micronutrients 66
  Vicki Deakin
• 9 Supplements and Ergogenic Aids 89
  Hans Braun, Kevin Currell and Samantha J Stear
• 10 Nutrition for Weight and Resistance Training 120
  Stuart M Phillips, Keith Baar and Nathan Lewis
• 11 Nutrition for Power and Sprint Training 134
  Nicholas A Burd and Stuart M Phillips
• 12 Nutrition for Middle-Distance and Speed-Endurance Training 146
  Trent Stellingwerff and Bethanie Allanson
• 13 Nutrition for Endurance and Ultra-Endurance Training 158
  Andrew Bosch and Karlien M Smit
• 14 Nutrition for Technical and Skill-Based Training 173
  Shelly Meltzer and Neil Hopkins
• 15 Nutrition for Disability Athletes 188
  Jeanette Crosland and Elizabeth Broad
• 16 Competition Nutrition 200
  Louise M Burke
• 17 Losing, Gaining and Making Weight for Athletes 210
  Helen O’Connor and Gary Slater
• 18 Eating Disorders and Athletes 233
  Jorunn Sundgot-Borgen and Ina Garthe
• 19 Bone Health 244
  Charlotte (Barney) Sanborn, David L Nichols and Nancy M DiMarco
• 20 Nutrition and the Gastrointestinal Tract for Athletes 264
  Jeni Pearce and John O Hunter
• 21 Immunity 281
  Glen Davison and Richard J Simpson
• 22 Travel 304
  Bronwen Lundy and Elizabeth Broad
• 23 Population Groups: I 316
  Children
  Fiona Pelly
  Female Athletes
  Nanna L Meyer
• Masters
  *Penny J Hunking*

• **24 Population Groups: II 335**

• Ethnic Groups
  *Weileen Png*

• Vegetarian/Vegan Athletes
  *Wendy Martinson*

• The Injured Athlete: Surgery and Rehabilitation
  *Nicola Maffulli and Filippo Spiezia*

• **25 Training and Competition Environments 357**
  *Joanne L Fallowfield, Joseph DJ Layden and Adrian J Allsopp*
